COMPROMISO

Sistema de gestión que cumple con los requisitos de Calidad de la Norma ISO 9001: 2008 para la fabricación de los Productos Joma.

Fruto de la Experiencia y la Innovación

JOMA es el fruto de una larga experiencia y de un permanente espíritu de innovación.

Una experiencia lograda a través de más de 60 años que nos ha hecho ser todo un referente, tanto en el mercado de los buzones, como en el de las cajas de caudales y los armarios metálicos. Años y años creando y desarrollando nuevos productos, hasta llegar a ser una marca conocida y reconocida en el sector.

Porque la búsqueda de los diseños más avanzados y el empeño por fabricar con la más alta calidad ha sido, y será, una de las constantes en la actividad diaria de JOMA. Un proceso de mejora continua que no se detiene. Porque nuestro departamento de I+D sigue investigando y creando nuevos prototipos. Y nuestros técnicos de fabricación trabajan, cada día, en localizar los últimos materiales, hasta conseguir los mejores acabados.

Buena muestra de este espíritu de innovación permanente es este catálogo que muestra nuestra amplia gama en la que, junto a productos que siguen teniendo una gran aceptación, se incluyen las novedades que hemos lanzado al mercado recientemente.

Y, todo ello, para poder seguir ofreciendo a nuestros clientes nuevos productos, nuevas soluciones. Por muchos años más.

Fruit of Experience and Innovation

JOMA is the result of extensive experience and a permanent spirit of innovation.

Experience accumulated over 60 years, allowing us to become a reference point on the mailbox, cash box and metallic cabinet markets. Years and years developing new products, which has led to us being a renowned brand in the sector.

Because the search for the most advanced designs and our determination to manufacture only top quality has been, and will be, one of the constants in the day-to-day activity of JOMA. An ongoing improvement process which never ceases. Because our R&D department keeps on researching and developing new prototypes. And our manufacture technicians work every day to find the latest materials and achieve the best finishes.

A good example of this permanent spirit of innovation is this catalog, which shows our extensive range. Here, along with our traditionally popular products, we include the latest items we have launched onto the market recently.

Our goal is to continue offering our customers new products and new solutions. For many years to come.
